Subject: BigOx IU Permit No. 2018-31-I
Date: Monday, April 29, 2019 1:33:29 PM

Tom:

As stated in my voice mail at about 1:20 pm today, the City of Sioux City will not be extending or re-issuing the BigOx Energy (BOE) Wastewater Discharge Permit. It expires on April 30, 2019.

We expect to receive flow that is in compliance with the current permit from BOE through April 30, 2019 and then have that flow cease sometime prior to May 1, 2019. Our intentions will be communicated to BOE and the City of South Sioux City. We are prepared to accept waste flow from BPI/Empirical and Richardson, having already established emergency permits with each, should this ever occur. Samplers are already active.

Thank you,

Mark Simms
